Dear Representative,

I keep asking myself why a state with the best Auto No Fault policy would want to change the way things are when they appear to be working so well. So well, in fact, that several other states have come to Michigan looking to adopt our policies! Why would other states spend time and money to travel to Michigan if it wasn't a plan that would benefit their own state? We have the best comprehensive coverage in the nation and it's shocking that legislation is trying to change that. It's obvious that the residents of Michigan agree that Auto No Fault is beneficial as they've **voted on 3 different proposals** to keep the policy in place. **Three times!!!** How many more times do residents need to express how they feel about this law? The insurance company is trying to show the average person saving money if these bills pass when in fact the amount saved is minuet compared to the amount a person would pay in medical bills alone! The facts are clear; please think about what would happen to Michigan's residents and economy if these bills are passed. **SAY NO HB 4936!**

Sincerely,

A handwritten signature in black ink that reads "Shannon Lambert CTRS, CBIS". The signature is written in a cursive, flowing style.
